● Profile

PMP-certified architect registered with the Saudi Council of Engineers, with three years across Saudi Arabia (Eastern Province and Riyadh) and Egypt. Currently in an architectural technical office, handling material submittals and shop drawing approvals so site works run without clashes. Background in site supervision, detailed shop drawings, fit-out and finishing, and 3D visualization that helps clients approve designs early.

● Experience

Architect, Technical Office

Current

Jida Project · Al-Ahsa, Saudi Arabia

- Review and approve material submittals against the project specifications.
- Check and clear architectural shop drawings so work on site can continue without clashes between trades.

Architect & Site Supervisor

From Apr 2025

Fanar International Arabian Company · Eastern Province, Saudi Arabia

- Fatmah Al-Rashed Park, Al-Ahsa** Completed: led the full site supervision, making sure landscape and structural elements met the client's quality standards and design intent.
- Al-Jabr School for Down Syndrome, Al-Ahsa** Completed: carried out architectural design changes, with custom door designs and strict RAL colour specifications fitted to the facility's needs.
- Tilal Qamra Safwa & Mosque, Dammam**: main architectural point of contact; produced and reviewed shop drawings for 6 villa types (blockwork, insulation, finishing, floor and wall tiles) and the project mosque.
- Coordinated with multidisciplinary teams to keep execution aligned with design specifications and quality standards.

Architect & Finishing Engineer

Sep 2023 – Nov 2024

Swilam Construction Company · Egypt

- Managed interior fit-out and finishing works for residential and commercial projects.
- Built 3D models and architectural visualizations to help clients approve designs.

● Selected design work

Ancient Egyptian themed metro station. Architecture and interiors: lotus columns, central obelisk, glass-roofed concourse, ticket hall, e-gates, café. Renders, top view and a 3D walkthrough film.

Residential interiors. Majlis and reception, master bedrooms, kids' rooms, modern kitchens and bathrooms, with full material and lighting design.

Facades. A four-storey corner residential building, a modern villa, and two concept buildings with curved and perforated shells.
